

## Project Design Phase Solution Architecture

Date	15 February 2025
Team ID	PNT2025TMID02948
Project Name	<b>Predicting Plant Growth Stages with Environmental and Management Data</b>
Maximum Marks	4 Marks

### Solution Architecture:

Solution architecture defines the **end-to-end technical implementation** of the project, ensuring seamless integration between **data sources, processing, analytics, and user interaction**. This architecture helps in **analyzing environmental and management data** to predict **plant growth stages**, allowing farmers and agritech companies to optimize crop yield and sustainability.

### Example - Solution Architecture Diagram:
